

Amendments To the Claims

Claim 1 (Currently amended) A stable, handicapped accessible picnic table, comprising:

a generally flat horizontal table top having a longitudinal axis, an upper surface, a lower surface,

first and second ends, and first and second sides;

at least one seat structure located on a side of the table top, the seat structure generally parallel

with the longitudinal axis of the table top, spaced away from the table top, and lower than the table top,

first and second leg supports supporting the table top and the pair of seat structures;

each leg support comprising:

an upright post having an upper end attached to the lower surface of the table top and

extending downward to a lower end adjacent a ground surface,

at least one first ground engaging member extending from the upright post generally

transverse to the longitudinal axis of the table top, the first ground engaging member

having an inner end attached to the lower end of the upright post and an outer end

beneath the seat structure;

a second ground engaging member attached to the first ground engaging member and

generally parallel to the longitudinal axis of the table top, the second ground

engaging member having an interior end attached to the first ground engaging

member outer end and an exterior end beneath the seat structure;

a seating support post attached to the second ground engaging member and extending

upward, the upright seating support having a lower end attached to the second

ground engaging member exterior end and an upper end attached to the seat

structure.

Claim 2 (Original): The picnic table of claim 1 wherein the first and second leg supports are bent to avoid sharp right angle corners.

Claim 3 (Original): The picnic table of claim 1 wherein the leg supports are of steel frame material.

Claim 4 (Original): The picnic table of claim 3 wherein the leg supports are steel tubing or pipe of circular cross section.

Claim 5 (Original): The picnic table of claim 1 which has a first and second pair of similarly configured leg supports.

Claim 6 (Original): The picnic table of claim 1 wherein the top and seats are dimensional wood planks.

Claim 7 (Original): The picnic table of claim 1 wherein the top and seats are dimensional plastic planks.

Claim 8 (Original): The picnic table of claim 1 wherein the top and seats are extruded aluminum stadium planks.

Claim 9 (Original): The picnic table of claim 1 wherein the top and seats are constructed of vinyl coated fabricated expended metal.

Claim 10 (Previously presented): The picnic table of claim 1 wherein the table top and seats are constructed of perforated steel.

Claim 11 (Original): The picnic table of claim 1 wherein the ends of the table top and the ends of the seat structure dwell in the same vertical plane.

Claim 12 (New): The picnic table of claim 1 wherein the seat structure is of about the same length as the table top's longitudinal axis.

Claim 13 (New): The picnic table of claim 1 wherein each of the first and second table top ends are open under its lower surface to allow wheelchair access.

Claim 14 (New): The picnic table of claim 14 wherein the upright post angles inward from the lower surface of the table top to promote wheelchair access.

Claim 15 (New): The picnic table of claim 1 wherein the leg support is of a single tube with bends between the upright post and the first ground engaging member, the first ground engaging member and the second ground engaging member, and the second ground engaging member and the seat post.

Claim 16 (New): The picnic table of claim 15 wherein each bend has a minimum radius of 2.5 times the tube diameter.

Claim 17 (New): The picnic table of claim 1 wherein a pair of first ground engaging members are attached to the upright post, a single tube with bends making the pair of first ground engaging member and the second ground engaging member.

Claim 18 (New): The picnic table of claim 17 wherein the single tube has further bends that make the seating support post.

Claim 19 (New): The picnic table of claim 1 wherein at least one of the upright post, first ground engaging post, second ground engaging post, or seating support post is a square post.

Claim 20 (New): The picnic table of claim 1 wherein the upright post includes a first table support member and a second table supporting member, each table supporting member having an upper end attached near a side of the table top and extending diagonally downward to a lower end in approximate vertical alignment with the longitudinal axis of the table top.
